Celebrating Ramadan | Passover | Easter 2022

Every three decades or so, these three holidays align with each other. Because the Islamic calendar is lunar; the Jewish calendar is lunisolar and the Christian calendar is solar, the number of days in a year may vary considerably, from 353 to 385 days depending on the calendar year used. Periodically, the Muslim holy days coincide with the holy days of Jews & Christians, just as they are doing in 2022.
