

STEM Plus

Integrate communications, problem-solving, creative and critical thinking skills into *STEM* lessons for K-6 grades.

FOR **CHARLEVOIX & EMMET COUNTY SCHOOLS**
WINTER 2020

STEM (Science Technology Engineering Mathematics) plays an important part in today's world, but arts and humanities play an equally important role--art being the expression of human creative skill & imagination and humanities being the study of how man understands & records the human experience. *STEM Plus* encourages connections between the arts and humanities skills of communications, collaboration (team-working), problem-solving, critical and creative thinking with *STEM* to provide a well-rounded grade-level curricular experience that helps students develop abilities that will serve them well in the work world, no matter what career they choose & help prepare them for a future, where adaptation to new and, as yet unknown occupations, is crucial.

Call Cheri at 231.536.3369 or email info@miravenhill.org to schedule a day for *STEM Plus* to visit your school.

Supported by the Charlevoix County & Petoskey-Harbor Springs Area Community Foundations.
