Raven Hill Discovery Center is a 501(c)(3) tax-exempt corporation.

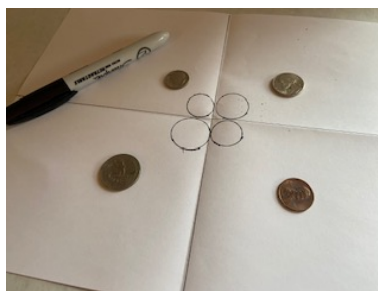

Mission: Raven Hill provides a place that enhances hands-on and lifelong learning for all ages by connecting science, history & the arts.

Coins

Find a quarter, dime, nickel and penny. Fold a piece of paper into fourths and use a ruler to draw the fold lines. Draw around the coins and fill each part with circles of quarter size in one, dime size circles in the second, nickels in the third and pennies in the fourth section. **Predict how many coins/circles will fit in each part!** Count the number of quarters, dimes, nickels and pennies. How many of each? Which part has the most circles? Which part has the least? How much money is in each part, that is how much total money in quarters, how much in dimes, etc.? Now find some markers or crayons or colored pencils or even different pens and pencils. Use your creativity to color in each circle. Make some look like Easter eggs! If you get tired of coloring, put your supplies away and come back to work on your drawing another time!

1. Get supplies.

2. Divide paper & draw around coins.

3. Color the circles all different!

Enjoy and be sure to put all your supplies away, when you are done.
